EDUCATION

University of South Florida

Bachelor of Science in Business Analytics and Information Systems, GPA: 3.6/4.0

Jan 2022 – Dec 2025

Tampa, FL

WORK EXPERIENCE

ClearSet.AI

Data Analyst

Jan 2026 – Present

Tampa, FL

- Performed cluster analysis using Python integrated with Power BI, reducing time to identify and interpret key data patterns by 30%.
- Enhanced Power BI analytics by integrating the OpenAI API to automatically generate natural-language summaries and interpretations of clustering results.
- Maintained interactive Power BI dashboards to monitor KPIs and deliver actionable insights for non-technical business stakeholders.

REACH Lab, University of South Florida

Undergraduate Research Assistant

Jan 2025 – Dec 2025

Tampa, FL

- Collected, cleaned, and analyzed research data using Excel, SQL, and Power BI, ensuring data accuracy and supporting evidence-based decision-making.
- Developed and customized a Power BI dashboard enabling real-time visualization of 1,000+ surveys for 2 research teams, leading to a 35% reduction in report generation time.
- Presented key findings and performance metrics through data visualizations, enabling stakeholders to quickly identify trends and insights.

Veralegal

Data Analyst Intern

May 2024 – Aug 2024

Tampa, FL

- Developed and optimized over 50 complex SQL queries to automate data ETL processes, reducing data processing time by 30% and ensuring timely delivery of actionable insights.
- Analyzed over 50,000 visa applications in SQL to detect irregularities, resulting in a 30% reduction in fraudulent submissions and safeguarding an estimated \$80K in potential revenue.
- Conducted exploratory analysis on 100K+ visa applications using SQL to identify 10+ data trends and inefficiencies, enabling a 20% reduction in approval times through targeted process improvements.

PROJECTS

Sports Fan Segmentation Analysis | MySQL, Python, Excel, Tableau

Aug 2025 – Oct 2025

- Engineered a unified master dataset in Excel by cleansing and integrating three disparate data sources from USF athletics, resulting in a 60% reduction in data retrieval time and enabling real-time comprehensive fan analysis.
- Developed and implemented a segmentation framework that categorized 1M+ fans into 4 data-driven personas, enabling targeted marketing efforts that improved campaign engagement rates by 30%.
- Created 4 custom Tableau dashboards aligned with key performance indicators, resulting in a 30% reduction in report generation time and enhancing decision-making for 10+ marketing team members.

Pizza Shop Data Analytics and Visualization | PostgreSQL, Power BI

May 2025 – Jun 2025

- Developed an interactive pizza sales dashboard utilizing SQL queries and Tableau visualizations, enabling real-time monitoring of daily revenue streams and increasing data accessibility for 50+ stakeholders by 15%.
- Executed 20+ SQL queries to automate the calculation of 12+ key performance indicators such as total revenue and average order value, reducing report generation time from several hours to under 15 minutes.

TECHNICAL SKILLS

- **Languages:** SQL, Python, HTML, JavaScript
- **Data and Analytics:** Tableau, Power BI, Excel (VLookup, Pivot Tables), Pandas, NumPy, Matplotlib
- **Tools and Platforms:** Microsoft Office Suite, PostgreSQL, MySQL, OpenAI API

CERTIFICATIONS

- **Certifications:** Anthropic: AI Fluency Framework & Foundations, Anthropic: Claude 101, Microsoft Azure AI Fundamentals (AI-900), Deloitte Australia - Data Analytics Job Simulation, Electronic Arts - Product Management Job Simulation, LinkedIn: PowerBI Dashboards for Beginners
